

Selecting the Right Privileged Access Management (PAM) Solution

Bert Blevins
@bertblevins

Identify requirements and define the scope of the PAM solution for your organization.

Bert Blevins
@bertblevins

Conduct market research, compare features, and consider key aspects like credential management and audit capabilities.

Bert Blevins
@bertblevins

Evaluate vendor reputation,
request demos, and assess support
services.

Bert Blevins
@bertblevins

Analyze costs, consider ROI, and ensure alignment with your financial plan.

Bert Blevins
@bertblevins

Check regulatory compliance,
security standards, and industry
best practices.

Bert Blevins
@bertblevins

Involve stakeholders, conduct PoC,
and make an informed decision.

Bert Blevins
@bertblevins

Negotiate terms, finalize agreements, and prepare for implementation.

Bert Blevins
@bertblevins

Develop a project plan, deploy the solution, and conduct thorough testing.

Bert Blevins
@bertblevins

Provide user training, ensure documentation, and promote adoption.

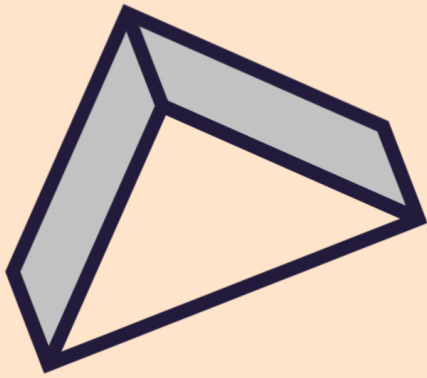

Bert Blevins
@bertblevins

Perform regular audits, keep the solution updated, and maintain security.
